Job Description

Get the opportunity to work for LIVE projects for 100- 500 crore turnover companies.

The selected candidate will directly work with the top management to work on product development, CRM, Analytics projects and key technology focus areas of the company.

We are working with some of the leading healthcare and other institutions in India advising them on how to use technology and marketing software to grow their business.

We are looking for people who want to work in exciting jobs and can handle complex situations. This job gives an excellent exposure to all aspects of technology and consulting.

Our team includes people from IIM, IIT, BITS Pilani, SP Jain and people from healthcare. Multiplier Solutions has an IIT-IIM, BITS Pilani team that helps customers grow faster and reach more profitable markets.

How this will help?

- Healthcare is a cash rich and evergreen industry not dependent on recession in Europe or US. Build a safe career.
- Application development, online marketing and social media marketing in healthcare domain are in increasing demand across industries
- Domain knowledge and consulting assignments that help you understand customer problems and grow your analytical skills
- You will get a better exposure than your classmates. Most of your classmates will be dealing with one small area of application development whereas here you will be learning at a much faster pace
